MUHAMAD NAJMUDEEN R

Title: Software Engineer

Location: Bangalore, India

Languages: English, Tamil, Hindi, Telugu

SUMMARY

Proficient in SQL with hands-on experience in Informatica PowerCenter, Snowflake, Dbt, AWS S3, and ETL development, working on data pipelines, data transformations, and data integration processes. Strong understanding of data warehousing, data modeling, data transformation techniques, and Slowly Changing Dimensions (SCD) with experience in supply chain data processing projects. Skilled in Java, Python, MySQL, Linux commands, and Excel functions, with basic knowledge of AI, Prompt Engineering, and AI Agents. Eager to learn new technologies and contribute to building efficient, data-driven solutions.

KEY SKILLS

Technical Skills: SQL, Informatica PowerCenter, Python, Snowflake, AWS, Java

Microsoft Excel, Linux, Basics of AI, Prompt Engineering.

Functional Skills: Time Management, Team Collaboration, Problem Solving, Communication

PROJECT EXPERIENCE

Organization: Capgemini Technology Services

Project Title: HR Analytics ETL Solution

Project Description: Worked on a data-driven HR analytics system focused on processing structured datasets and implementing ETL workflows to generate reliable and business-ready data outputs.

Role/Title: Data & ETL Contributor

 Copyright © 2026 Capgemini. All rights reserved.

Software/Languages: SQL, Data Warehousing, and ETL Concepts

Responsibilities:

- Built and executed ETL workflows using SQL to process and transform structured datasets for downstream usage.
- Collected, cleaned, and standardized data from multiple sources to improve consistency and reliability.
- Applied data transformation techniques and implemented business rules for accurate data processing.
- Implemented Slowly Changing Dimensions (SCD Type 1 & Type 2) to manage historical and real-time data updates.
- Applied data warehousing concepts to organize and store data for efficient querying and reporting.
- Collaborated with team members to ensure accuracy and timely delivery of processed datasets.

TRAINING & CERTIFICATIONS

- **Data Engineering & Backend Training – Capgemini**
  Hands-on training in Oracle SQL, Informatica MDM, Python, and Java. Worked on real-time ETL and data transformation use cases.
- **Python Programming Certification**
  Completed foundational training in Python, covering basic programming concepts, data structures, and scripting.
- **Oracle SQL Certification**
  Developed strong skills in database querying, joins, data manipulation, and performance optimization.

EDUCATION

Kalasalingam Academy of Research and Education - Information Technology (2021 – 2025)

CGPA: 8.14
